She attended an advanced training workshop entitled, "How to Develop Persuasive Messages with Science of Storytelling," which linked and explored the neurological effects messaging can have on audiences; as well as an engaging session on how Johnson County in Kansas was successful in passing a public safety sales tax with the support of social media. She hopes to utilize some of the skills and lessons learned as the City moves forward on various projects.

Note: Typically, the YTD numbers are generated by adding the current week statistics to the YTD statistics from the previous reporting period. Periodically, the numbers for this report will be generated from the beginning of the year to capture data that may have otherwise been omitted due to a processing delay or other administrative anomaly, more accurately updating the year-to-date totals.
