CITY OF NEWARK
DELAWARE

October 8, 2018

TO: Planning Commission Members

VIA: Mary Ellen Gray, Planning and Development Director

FROM: Thomas Coleman, Acting City Manager TC
David Del Grande, Director of Finance DD

RE: Submission of the 2019-2023 Capital Improvement Plan

The first draft of the 2019-2023 Capital Improvement Plan (CIP) for the City of Newark is attached for your review in advance of the October 16, 2018 meeting of the Planning Commission. The City's Charter requires that a listing of all planned capital improvements be submitted to the Mayor and Council on an annual basis. The CIP document is being provided for your review and consideration pursuant to Section 2-89 of the City Code, which requires that the Planning Commission, after considering the advice of the Planning Director, advise City Council on expenditures for capital improvements where such improvements refer to a matter covered by the comprehensive plan.

The CIP document is a planning tool for projects and purchases that have a life expectancy of over six years and/or a cost of more than $20,000, although exceptions to this rule may apply for reasons of funding type or purpose. The CIP document as presented here or as modified during the ongoing budget preparation process will also be presented to Newark's Mayor and Council with the overall operating budget for 2019.

The projects and purchases presented were developed over months of departmental research and prioritization, including numerous administrative budget hearings. The projects represent the recommendations of our department directors and our financial and administrative staff. Additionally, it is deemed that the projects and purchases are of a level that we can achieve and that are in the best interest of our community. On each detail sheet, it is noted how the respective project aligns with the City's Comprehensive Plan vision elements, provides code references for certain required projects, and provides the estimated operating impact resulting from the project, if applicable. The 2019 CIP shows only minor changes from what was presented to the Planning Commission in 2018. The successful referendum in June 2018 provided a path forward to blend debt financing into our Capital budget, providing more predictable funding and smoothing out year to year fluctuations in spending. The 2019-2023 Capital Improvement Plan balances the City's use of reserve spending, along with the responsible use of the State Revolving Loan Program/bond authorizations for selected projects.

Your review of this document is sincerely appreciated. We look forward to presenting the highlights and answering any questions you have on the evening of October 16, 2018. In an effort to maximize efficiencies, save money, and "be green," this document is only being provided electronically and will be posted to the City's website for reference. If you prefer a bound copy, please reply and we will construct and deliver a hard copy to you.

CAPITAL BUDGET - PROJECT DETAIL	
DEPARTMENT:	Electric
DIVISION:	Electric
FUND:	Electric
PROJECT LOCATION:	Various locations in the City
PROJECT PRIORITY:	1 - Highest Priority Level Project underway and must be completed
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Sustainable Community

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	Perpetual
Est. Completion Date:	Perpetual
Est. Useful Life (in years):	30 Yrs.
Est. Total Cost:	$ 800,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 125,000
% Complete (if underway):	15.6%
Balance to be funded[1]:	$ 675,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:	5195106.9860	$ 310,500
Materials:	5195106.9760	$ 364,500
Other Contracts:		$ -
TOTAL PROJECT COST		$ 675,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

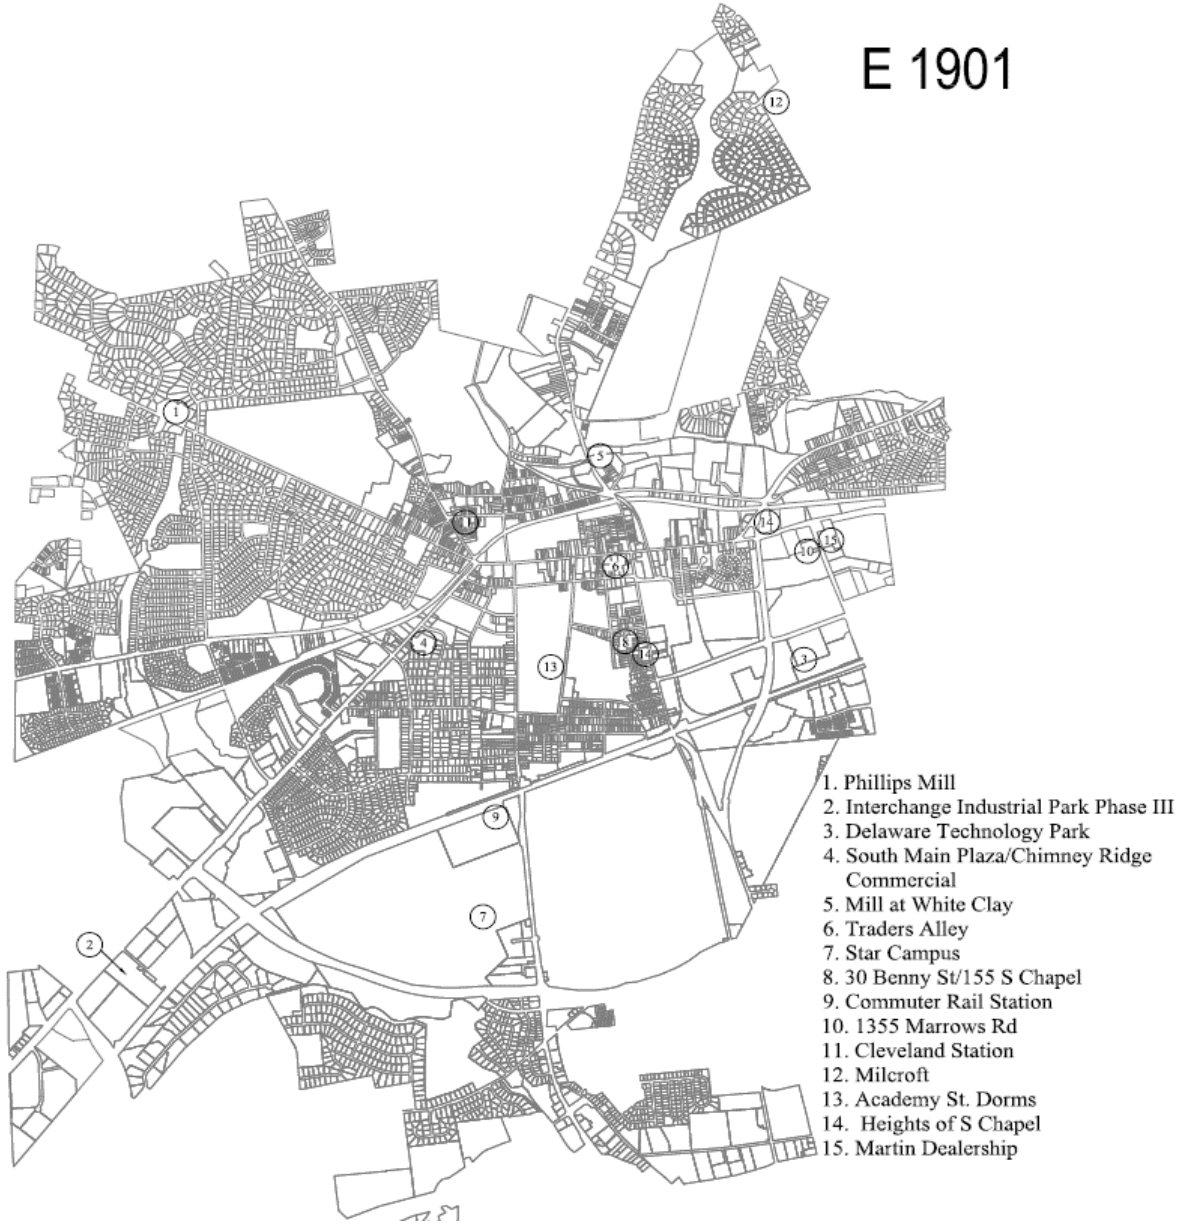

Installation of electric distribution lines in new developments. This includes both overhead and underground primary and secondary service lines. This project is required based on the obligation to serve new customers in the City.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

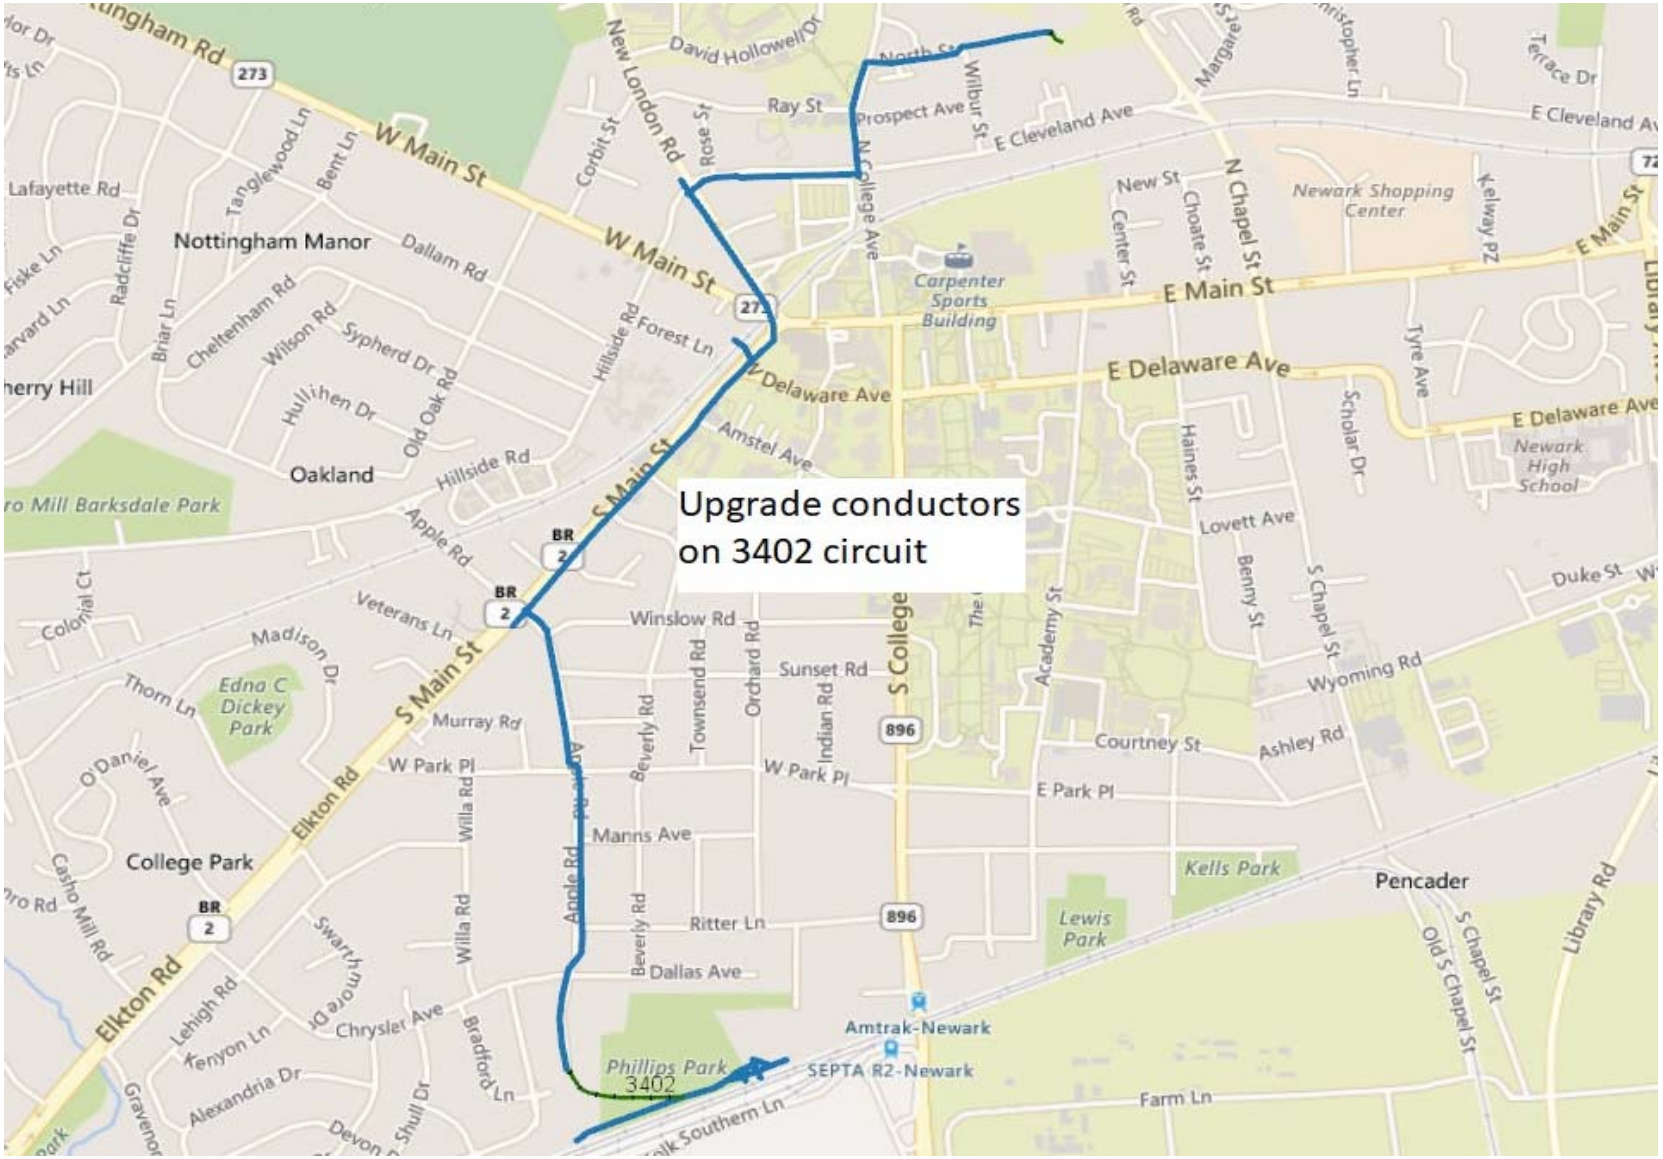

This project will upgrade the aerial and underground cable on 35kV line 3402 to ensure capacity and reliable back-up capacity to the Phillips substation, Chestnut Hill substation, Sandy Brae substation and West Main substation. This upgrade will also allow us to tie this feeder to the new substation in the future if needed.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

To ensure capacity and reliable back-up capacity to the Star Campus, the University of Delaware South Campus and City customers on South College Avenue, it is proposed to install a new 12,470 volt circuit from Old South Chapel Street to South College Avenue through the University of Delaware Farm. This project is based on approval from the University of Delaware.

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2015
Est. Completion Date:	2023
Est. Useful Life (in years):	30
Est. Total Cost:	$ 720,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 120,000
% Complete (if underway):	16.7%
Balance to be funded[1]:	$ 600,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		$ -
Materials:		$ -
Other Contracts:	5195106.9760	$ 600,000
TOTAL PROJECT COST		$ 600,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Underground electrical distribution equipment needed for the Star Campus. Expenditures to be reimbursed by the Developer or Customer.

PROJECT FINANCING BY PLAN YEAR

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2005
Est. Completion Date:	2022
Est. Useful Life (in years):	20
Est. Total Cost:	$ 1,974,896
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 619,896
% Complete (if underway):	31.4%
Balance to be funded[1]:	$ 1,355,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:	5195106.9860	$ 266,500
Materials:	5195106.9760	$ 934,500
Other Contracts:	5195106.9960	$ 154,000
TOTAL PROJECT COST		$ 1,355,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The auto transfer system will allow intelligent transfer of substations on the 34.5kV subtransmission system using reclosers to isolate a faulted circuit and switch a substation to a different circuit if all logic conditions are met. Large outages will be reduced to about a minute and a notification of a transfer will be sent to on call personnel to investigate.

Also includes (previous CIP E1802) - 15kV Automatic Switching:

This project will add 8 - 15kV reclosers to the existing automation software in 2018 to improve reliability to customers at the Delaware Technology Park and customers on Bellevue Road. The reclosers will automatically isolate a faulted circuit and switch the customers to a different circuit if the alternate circuit is available. In 2019, 11 reclosers (roughly $22,700 each) will be installed to improve reliability to the UD Center Campus and North Campus. In 2022, 10 reclosers (roughly $45,000 each) will be installed on South College and the Christina Parkway to improve reliability to the UD South Campus and the Star Campus.

Our existing SCADA system has become a legacy system so our SCADA provider has proposed to the City to upgrade our existing SCADA system to a newer platform in order to keep up with the industrial standards.

Other Contracts:	5295206.9960	$ 445,550
TOTAL PROJECT COST		$ 665,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

According to AWWA, "Each valve should be operated through a full cycle and returned to its normal position on a schedule that is designed to prevent a buildup of tuberculation [rust formation in pipes as a result of corrosion] or other deposits that could render the valve inoperable or prevent a tight shutoff. The interval of time between operations of valves in critical locations or valves subjected to severe operating conditions should be shorter than for other less important installations, but can be whatever time period is found to be satisfactory based on local experience. The number of turns required to complete the operation cycle should be recorded and compared with permanent installation records to ensure that full gate travel (i.e., it can be opened and closed) is maintained.

This project proposes to develop a valve exercising program utilizing our GIS database and contract documents in 2019 that would be put out to bid in a multi-year contract with an initial goal of exercising all valves in the system within the first 5 years. During this period we would also re-visit previously exercised valves to attempt to determine the appropriate return interval for service in the coming years. Once the first round of this program is complete, this program can be moved into the operating budget.

It is our current expectation that we should exercise valves no less frequently than every 2 to 3 years but we have spread out the initial round over 5 years because it is our expectation that there will be a higher than normal failure rate resulting in higher than normal replacement costs. Each valve that cannot be successfully excercised will be recommended for replacement. If the valve should fail, the replacement will occur as soon as possible to avoid service disruption. We will revisit this estimate annually during the program as we have more data to support optimization.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

This project will fund source water protection efforts in the White Clay Creek watershed, upstream from our surface water intake at the Curtis Water Treatment Plant. The goal for these projects is to reduce risk of contamination from both point and non-point source pollution sources. Additionally, projects may also seek to reduce bacterial, nutrient, and sediment loading in the creek which will improve water quality, improving treatment efficiency, while reducing electrical and chemical costs slowly over time. As an added benefit, in addition to Source Water protection, we are also in discussions with DNREC to allow the efforts from these projects to be included in our NPDES Permit compliance reporting, which would benefit the Stormwater Utility.

Previously, projects of this sort have been funded on an ad-hoc basis using operating funding when available. In order to realize a benefit, this will require a long term commitment allowing community partners with leveraging funding a reliable matching funding source. Additionally, the PWWR Department is working with the UD Water Resources Agency and the Nature Conservancy with funding from the William Penn Foundation to develop the Brandywine-Christina Healthy Water Fund (Fund). The goal of this fund is to implement a funding mechanism and science-based investment protocol to restore the Brandywine-Christina watershed to fishable, swimmable, and potable status within 10 years. A water fund is a mechanism for downstream beneficiaries to invest in upstream conservation measures designed to secure freshwater resources – both quality and quantity. Our funding would be leveraged to access other funding sources, multiplying our impact. Moving forward there will be a consistent source of projects, prioritized by their cost effectiveness at achieving the fishable, swimmable, and potable goal. A pilot project for this fund was completed in 2017 and the results have been positive so far. We anticipate another pilot project to be completed in late 2018 to further evaluate the potential benefits of long term participation in the Fund.

For more information on the fund please visit:
http://www.wra.udel.edu/brandywine-christina-healthy-water-fund/

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

REFERENDUM PROJECT

'This project will fund the design and construction of a new drinking water treatment plant or supply configuration changes necessary for the reliable supply for the existing treatment plant, capable of processing the existing public supply wells in the City's Laird Tract Well Field (LTWF). The wells, installed in 1971 (Wells 23 & 25) and 1990 (Well 20 & 21), pumped groundwater directly into the system with no filtration; however, as government regulations were developed and due to the City's commitment to providing high quality drinking water, the Laird well water is no longer adequate for direct distribution. Specifically, the water quality of the wells consists of elevated levels of iron, manganese, and hydrogen sulfide, none of which present a risk to human health but do result in poor aesthetics (i.e. taste, color, odor).

The reintroduction of the LTWF wells would provide the City with up to 1.5 million gallons per day, which becomes more important in times of drought, when we would be able to continue to draw up to 1.5 mgd when our creek passby requirements are not being met and our surface water intake is shut down. Alternatives include additional feeds that would introduce well water to the Newark Reservoir, which can have nutrient problems due to pumping of nutrient rich water from our surface water intake. We anticipate testing and rehabilitating the wells in 2020 along with the design of the collection system upgrades with the full project being constructed in 2021.

The wells located in, or adjacent to, the protected lands of the White Clay Creek State Park provide the City a reliable long-term water supply solution. The parkland surrounding the LTWF is in direct contrast to the City's South Well Field Treatment Plant (SWF) where the land use is predominantly commercial/industrial resulting in higher risk of contamination.

We have submitted an application for funding through the State Revolving Loan Fund based on the successful passage of the 2018 Referendum. We anticipate being eligible for Project Planning Advances and Planning Grants to help offset the costs of planning and design.

TOTAL PROJECT COST		$ 70,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

We currently have backup generation at the South Well Field Treatment Plant (SWF) which would allow the plant to continue operating during an emergency. Unfortunately, there are only three wells that also have backup generation capability and of those, only one could be used during a widespread power outage due to groundwater contamination. Due to this, the fact that we have backup power at SWF is generally irrelevant and the plant would be basically offline during emergencies. Fortunately, as long as the Curtis Treatment Plant is online and fully operational we can go without SWF if needed, albeit at a higher cost of production and the potential need for water restrictions depending on the time of year.

When this project was originally created, two of our three current high production wells - wells 15 and 17 - lacked backup power. This project originally proposed the installation of generators at each well. The sites will be served by natural gas or diesel generators with a preference toward natural gas, if available. Since the original proposal of the project, we have been able to repurpose an obsolete generator from the old Arbour Park booster station to operate Well 15. The cost was less than $5,000, saving approximately $50,000 from this project.

Total estimated cost for backup power for a well is $70,000 for natural gas or $58,000 for diesel, per location. 2018 will cover engineering and bid preparation for Well 17 and the NW Booster along with the actual construction at the NW Booster. 2019 will cover construction at Well 17.

We have applied for Grant Funding through the FEMA Pre-Disaster Mitigation Grant and we anticipate receiving this funding once we have the specifications written for the NW Booster Installation. If the grant remains open, we will apply for the Well 17 installation.

TOTAL PROJECT COST		$ 275,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The higher elevation areas of Roseville Park and Delaplane Manor subdivisions have very low water pressure and little fire protection water flows, often losing pressure entirely when a hydrant downhill is opened creating potential for backflows and excessive water discoloration. The first year of this project was to investigate alternative solutions with costs to be used to budget for design and construction in 2021 depending on funding availability.

We have identified the best solution which is a booster station that will be located on Laurel Avenue. This solution was more cost effective than the other options while providing a larger improvement to pressures. Due to the piping configuration we believe this installation can be performed using in-house forces. If we determine otherwise once we get further into the design phase the construction cost estimate will have to be revised upward at that time.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The City of Newark's drinking water currently comes from one of three sources, the Newark Water Treatment Plant (NWTP), South Well Field (SWF), and interconnections with Suez (formerly United Water) and Artesian Water Companies. If we were to have a long term outage at the NWTP (plant maintenance or failure resulting in NWTP being fully or partially offline for several days), SWF will be unable to keep up with demand, requiring the purchase of water from either Suez or Artesian. NWTP can usually keep up with demand if SWF were to be out of service but may require water purchases if the SWF were to fail during the peak season. In 2014 we had to purchase water from United during the NWTP filter rehab project and experienced a failure of the 2.0 MGD pump, requiring significant repairs.

Our interconnection with Suez, located at the intersection of Academy Street and Waterworks Lane, is the existing interconnection location best suited to serve as the backup supply for the NWTP. The existing station has three pumps which produce 1.0, 1.5 and 2.0 million gallons per day, located in the basement of the old brick building. The pumps and building at this location are in exceedingly poor condition and will require significant repairs and possibly complete replacement if we are to rely on them for backup water service long term. This project scope has been modified in 2017 and beyond due to the relocation of the interconnection because of a relocation of the Suez water interconnection location to the south side of the railroad tracks due to the construction of the new Train Station. The new location features standpipes and valves to which we will connect a portable pump on a temporary basis if the need for water purchases arises. We have an on-call availability agreement with Godwin Pumps to be able to have this interconnection up and running within 24 hours. The planning for the out years contemplates a permanent building and pumps or self contained pump package similar to recent upgrades at the Northwest Booster Station and the Arbour Park Booster Station.

Other Contracts:	5295206.9740	$ 3,090,000
TOTAL PROJECT COST		$ 3,090,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

REFERENDUM PROJECT

The current air stripper has been in service for approximately 15 years running 24/7 and is likely nearing the end of it's service life. The system is very difficult to maintain due to its location on top of the raw water tank. Although effective at removing the harmful contaminents in the groundwater, it is unable to adequately treat all of the available source water (wells 14r and 16) resulting in these wells sitting idle. Furthermore, because there is no redundency in the treatment process if the air stripper were to fail the South Well Field Treatment Plant (which accounts to roughly 40% of the City's water production) would need to be shut down.

The 2018 Referendum included this project to utilize the State Revolving Loan in order to complete the design and construction. As part of the planning process for the referendum, our consultant, AECOM, reviewed the process upgrades necessary and has recommended several new configuation possibilities at the SWFTP that would incorporate the air stripping requirements as well as removal or rehabilitation of the lead-coated storage tanks at the site.

Due to the current rehabilitation at our Curtis Water Treatment Plant, we anticipate the design and bidding to be completed in 2019 and construction beginning in early 2020.

Funds were deauthorized in year 2019 from Capital Project W8605 in the amount of $350,000, in order to partially fund Capital Project W1402 in 2019.

$90,000 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The Water Department has over time developed various well fields that are no longer in use. In several cases the well head and associated piping including the well itself are still on site and subject to vandalism and possible contamination of the aquifer. This project will allow us to seal the old wells and deactivate the sites. Wells that we will be considering for closure include those associated with the City of Newark's North Well Field at Lewis Park. Any work will be done in coordination with the DNREC Division of Water, Water Supply Section to obtain authorized abandonment permits and reports.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

This project will provide alternative disinfection equipment at the Curtis Water Treatment Plant (CWTP). The gaseous chlorine that we currently use is subject to increasing regulatory action. We plan to replace the gaseous chlorine with bulk sodium hypochlorite with a system similar to what is in use at the South Well Field Treatment Plant. As part of our study to select an appropriate replacement for gaseous chlorine we investigated the need for building upgrades and identified a variety of necessary rehabilitation work including roof and siding replacement, insulation replacement, ventilation upgrades, and interior layout changes.

Work has commenced on this project as of August 2018. We anticipate the majority of the work to be completed by Spring 2019. We have added $25,000 in 2019 funding to cover any incidentals that will inevitably arise on a $2mm project.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

REFERENDUM PROJECT

Development of a SCADA System for the PWWR Department will allow us to more efficiently and effectively manage and monitor the utilities. We currently have four water plant operator positions that work three shifts per day, every day of the year. With a SCADA System, we will significantly reduce the need to drive to each facility at least once per shift. This will also free up time for the operators to perform routine preventative maintenance tasks that are currently either contracted out or not completed at all. Management staff will also be able to monitor system data and performance to assist the planning of capital spending and recommend operational efficiencies.

After a thorough search, the City in 2016 selected a new integrator experienced in the water and wastewater industry to provide a turn-key product. Our integrator, ACS, is currently working on the implementation of all of the water facilities, including assisting in the rehabilitation of the Curtis Water Treatment Plant.

$6,000 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

REFERENDUM PROJECT

Ductile and cast iron water mains have an expected lifespan of between 75 and 100 years and make up over 95% of our distribution network. There are a large number of mains in Newark's system that are either approaching the end of their expected lifespan or have experienced a higher than normal rate of failure (main breaks). In order to properly replace mains with a 100 year lifespan, we should be replacing 1% per year, assuming an even distribution of pipe age. Current year pricing for replacement of 6" water main was $240 per foot which means that in order to sustainably manage our distribution network, we should be spending a minimum of $1,500,000 per year.

This project involves either replacing mains or lining the interior to minimize main breaks, improve water quality, and improve fire flow. In 2017 we completed replacement of the water main along East Park Place from South Chapel to Manuel Street and replacement of the main on Dallam Road from Old Oak to Bent Lane. In 2018, we did not complete a project as funding was not available prior to passage of the 2018 Referendum. In 2019, using State revolving Loan Funds, we intend to complete the portion of East Park Place from Manuel to Academt Street and replace the water main along Wilson Road and upgrade an undersized pipe along West Main Street. Exhibits are attached to this CIP sheet.

We also intend to initiate the evaluation of several conditions assessment technologies to help guide the decision process for the segments to address in the out-years.

$30,000 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

DEPARTMENT:	Public Works & Water Resources
DIVISION:	Water
FUND:	Water
PROJECT LOCATION:	Various
PROJECT PRIORITY:	2 - High Priority Level
Critical need to remediate failing service, prevent failure, or generate savings	
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Sustainable Community

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	1986
Est. Completion Date:	Perpetual
Est. Useful Life (in years):	15
Est. Total Cost:	$ 1,932,763
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 21,763
% Complete (if underway):	1.1%
Balance to be funded[1]:	$ 1,911,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		$ -
Materials:		$ -
Other Contracts:	5295206.9760	$ 1,911,000
TOTAL PROJECT COST		$ 1,911,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

"REFERENDUM PROJECT This project will continue the evaluation and rehabilitation of our water tanks in various locations throughout the City. Water Tank surface coatings generally last 15 years. Several of our tanks have lead present in the existing coatings. Lead removal will be required at the next scheduled painting and additional funding has been included to account for additional testing, notification, specification and contract document updates, and safety precautions.

The current painting schedule is:

2019-2023 CIP

2019 - South Well Field raw and finished water tanks (each 500,000 gallon ground tanks) - Lead present in current coating. $300,000 each, need to be completed simultaneously because the treatment plant will have to be taken offline during blasting and painting. May require water purchases during painting so we have included $100,000 to cover this cost. Last painted in 2003. Funding was authorized in 2018 Budget to be part of SRL Funding resulting from the passage of the 2018 Referendum. In order to line up with the CWTP Upgrades, this funding will carry forward until project can be completed.
2020 - Arbour Park Tank (500,000 gallon ground tank) - Lead present in current coating. $350,000, last painted in 2003
2021 - Dallam Road Tank (565,000 gallon ground tank) - Lead present in current coating. $350,000, last painted in 2003
2021 - Nottingham Road (West Main) Tank (220,000 gallon ground tank) -Lead present is current coating. $350,000, last painted in 2003
2022 - New London Tank (2,000,000 gallon ground tank) - $500,000, last painted in 1997

Future CIP

2030 - Windy Hills Tank (300,000 gallon elevated tank) - $900,000, last painted in 2015
2031 - Concrete Tank (3,200,000 gallon ground tank) - $550,000, last painted in 2015
2032 - Louviers Tank (1,000,000 gallon elevated tank) - $750,000, last painted in 2016

Note - Due to the presence of lead in the existing coatings and the methods required to remove and dispose of the lead properly, we are exploring the option of removing the entire tank and replacing them. Preliminary cost estimates show similar pricing when all things are considered.

Please note that $350,000 was deauthorized in 2019 to be transferred to Capital Project W1402. In addition, $11,000 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

REFERENDUM PROJECT

'This project affords the continuation of our cleaning and investigation of the condition of the sanitary sewer system and will result in recommendations for repair. To date we have inspected approximately 10 miles of the 95 miles of sanitary sewer main in our system. Using results from 10 miles of inspections we have identified and prioritized approximately $2,600,000 worth of necessary repairs. To date our inspections have been prioritized based on line size and backup history. As part of the ongoing sanitary sewer master plan project we have completed sanitary sewer flow monitoring in the Christina Basin and the White Clay Basin largely paid for by grant funds throught the State Revolving Loan Fund. This flow monitoring will allow us to target inspections on those areas where we are experiencing the most rainfall derived inflow and infiltration (RDII) which is a good indicator of structural damage in pipes. (rainfall can get into the pipes through cracks and holes). This will allow for a more targeted, data driven approach to investigations. The flow monitoring will also be used for a capacity model that will allow us to target select lines for capacity increases when performing rehabilitation efforts.

In 2018 we completed repairs and installed lining in segments of pipe identified in the above referenced investigations. We also inspected critical areas ahead of planned DelDOT and City paving jobs, most notably Main Street and Delaware Avenue. In 2019 we plan to continue targeted inspections based on data derived from flow testing. We also plan to ramp up rehabilitation/replacement as determined by the prioritization and capacity model driven pipe diameter increases. Area maps for planned work in 2019 are attached.

$55,000 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

REFERENDUM PROJECT

City staff has identified the shuttered Rodney Dormitory parcel as ideally located at the top of a watershed in Newark with downstream drainage problems. The City has entered into a contract to purchase the parcel from the University of Delaware. After a year long public process to identify the features that residents wanted to see incorporated into the park and stormwater facility, the project was approved by voters in the 2018 Referendum. The project was also approved for funding through the State Revolving Loan Fund for $9mm at 2% interest. The funding shown below is the latest estimate of timeline for completing the project, including remediation, demolition, purchase of the property, grading, and park amenities. Project Planning Advances and Planning Grants as well as Brownfield funding, have also been taken advantage of for this project.

$163,500 was added in 2019 in order to recognize the capitalized interest payments for debt service for the State Revolving Loan.

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

An engineering consultant has completed a detailed CCTV Inspection and Priority Ranking in order to aid the decision making for the future replacement or rehabilitation of all of the known Corrugated Metal Pipe (CMP) in the City. The issues with the premature failure and deterioration of CMP has been well documented over the past several years and will be the focus of this Capital Project over the next 10 years. The memorandum from JMT identifies approximately $3.5mm in lining and replacement of CMP over the next 10 years. PWWR recommends the CIP reflect approximately $350,000 per year over the next 10 years to address the problem pipe. JMT has prepared a 14 year plan for the repairs and annual repair locations have been presented as part of any Contract Recommendation brought to Council in annual budget presentations each year. Exhibits are attached for the anticipated work in 2019. Emergent and newly identified problems may arise over the term of this project and will be paid for under this project. Examples of this type of emergent work are the Jenneys Run Culvert Removal in 2016 and the Creek Bend Court Outfall Failure in 2014. In 2018 we replaced the outfall of a culvert crossing on Wyoming Road which had recently failed. The City has ownership of numerous parks throughout the city, some of which are simply maintained as open area and are very underutilized. Several of those parks are around or near critical drainageways and the opportunity exists to design detention basins or water quality facilities at those locations. The Parks and Recreation Department could realize savings by removing the maintenance responsibilities and the Public Works and Water Resources Department could utilize these areas to mitigate flooding and water quality issues throughout the City. The areas were identified for a number of reasons, including, but not limited to, location within a watershed, level of probable benefit, ease of construction, reduction in maintenance burden on Parks staff and aesthetic benefit of plantings. Parks Dept. has been consulted and will work with PWWR to determine availability of property. Grant opportunities also exists to incorporate innovative design and new technologies to study the effect on the watershed.

The following parks have been identified for further review and study:

1. Park off of Short Lane
2. Lewis Park
3. Handloff Park (NE Corner)
4. Kells Park
5. Devon Park

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Per the 1999 NPDES Phase II Stormwater Quality Regulations, the City of Newark is required to meet approved standards to improve stormwater quality. According to our original plan submittal, we had planned the following: Install in-line storm sewer quality controls at McKees Park, Rahway Park, Handloff Park, and Yorkshire Woods I.

We received a surface water planning grant in 2014, part of which paid for a report to identify and rank water quality Best Management Practices (BMP) retrofits in stormwater basins around the City, which are better suited to retrofits than the original list above.

We chose not to complete a 2015 project due to uncertainty associated with impending changes to our permit of which we have been provided a pre-publication draft. We have commented on the pre-publication draft and anticipate the Final Permit in 2019. In 2018, we are in process of purchasing an aeration system for an exiting pond that will increase the water quality leaving the site. We are planning on $40,000 annually to help with permit compliance.

Depending on the type of facility constructed, ongoing maintenance will be required including mowing, invasive weed removal, inspections, etc. We have assumed $1,000 per year per facility in maintenance costs.

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

REFERENDUM PROJECT

In 2016 we contracted with a consultant to utilize an optimization software to analyze our road survey data. This program provided the City the optimal street repair locations and methods to use for the most economical use of our funding. The result of the analysis was confirmation of the need for an increase in funding for road rehabilitation or else the average Pavement Conditions Index (PCI) for the city will continue to decline and the backlog of needed improvements will continue to increase. As we have previously discussed, the optimization analysis shows that we would need to spend approximately $1.5 - $2.0 Million each year to maintain our current roadway conditions. We ran deterioration simulations using five different annual funding levels: $750M, $1MM, $1.5MM, "Maintain Current Conditions" and "Improve to average PCI of 80."

$750M - Backlog increases from $14.5MM to $29.2MM, PCI decreases from 76 to 61, % "Poor/Very Poor" increases from 20% to 27%
$1MM - Backlog increases from $14.5MM to $24.8MM, PCI decreases from 76 to 65, % "Poor/Very Poor" increases from 20% to 22%
$1.5MM - Backlog increases from $14.5MM to $17.2MM, PCI decreases from 76 to 73, % "Poor/Very Poor" decreases from 20% to 13%
$1.75MM - Backlog decreases from $14.5MM to $12.9MM, PCI remains the same, % "Poor/Very Poor" decreases from 20% to 8%
$2.1MM - Backlog decreases from $14.5MM to $8.8MM, PCI increases from 76 to 80, % "Poor/Very Poor" decreases from 20% to 4%

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

REFERENDUM PROJECT

The US Department of Justice per the ADA (American with Disabilities Act) requires incorporated communities to establish a transition plan to upgrade their public facilities to meet ADA accessibility standards.

ADA Handicap Ramps **As of April 1, 2018**	
ADA Compliant Ramps	1,431
Non-ADA Compliant Ramps	342
Total Ramps	**1,773**

Locations in Need of Ramp	5
Ramps to be contracted in 2018 pending Council Approval	30

The 2019 ADA Accessibility Contract will address approximately 40 of these non-compliant ramps, assuming favorable bid results that allow us to execute the entire proposed contract.

Since we have a plan in place to address non-compliant ramps and are successfully following the plan we are in compliance with the ADA.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

PWWR has from time to time rented a skid steer type piece of equipment for various in-house projects over the past 5 years. It has come in handy on these projects and allowed all divisions to complete tasks more efficiently and effectively. There are several implements that can be fitted to the front of the machine including, but not limited to the following:

snow blower - the anticipated two-way cycletrack on Delaware Avenue will require a piece of equipment to remove the snow in a smaller space than our traditional plows will be able to. This option would allow us to blow the snow directly into a dump truck for removal from this busy road.

asphalt milling head - Currently asphalt patches are completed in three steps by sawcutting, digging out the old, then laying the new asphalt. This head would allow us to quickly mill out the old paving and lay the new paving, likely in the same day. Use in conjuction with the asphalt patching machine would allow a better repair of problem potholes.

rotary broom - easy cleanup of road surfaces after maintenance operations

snow plow

CAPITAL BUDGET - PROJECT DETAIL	
DEPARTMENT:	Public Works & Water Resources
DIVISION:	Street
FUND:	General
PROJECT LOCATION:	Various
PROJECT PRIORITY:	2 - High Priority Level
Critical need to remediate failing service, prevent failure, or generate savings	
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Healthy & Active Community

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2015
Est. Completion Date:	2023
Est. Useful Life (in years):	20
Est. Total Cost:	$ 1,057,759
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 957,759
% Complete (if underway):	90.5%
Balance to be funded[1]:	$ 100,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	ACCOUNT NUMBER	AMOUNT
Labor:		$ -
Materials:		$ -
Other Contracts:	3063006.9760	$ 100,000
TOTAL PROJECT COST		$ 100,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Newark City Council has approved the "Newark Transportation Plan" and "Newark Bicycle Plan" and this project intends to begin implementing the recommendations contained within each plan.

The major part of this project, the Main Street pedestrian upgrades, is scheduled to begin in March of 2019 in conjunction with the repaving of Main Street.

Funding remains in the out years in order to take advantage of grant opportunities, which are typically 20% matches for federal money.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The Newark Police Department initiated equipping its patrol vehicles with mobile video recorders (MVRs) in 2009 and selected L3 Mobile -Vision Inc. as the fleet MVR solution. The direct and corroborating evidence captured from the MVRs has been beneficial for evidence-based prosecutions. Moreover, with the ubiquitous presence of digital evidence being available from smart phones to vast surveillance platforms, police departments are often expected to have capabilities to capture digital evidence. These expectations are held by the general public and range to the prosecutor's office. Newark Police Department's mobile video solution has reached it end of life expectancy and in fact are no longer supported for hardware issues and current in car Flashback systems are no longer eligible for coverage. Subsequent to the installation of the L3 Mobile-Vision Inc. in the vehicles, the police department integrated building interview rooms to the same platform. The integration allowed officers and investigators to store and retrieve digital evidence in a seamless manner.

The police department is seeking to implement a fully integrated solution for its officers/investigators to include mobile video recorders (MVRs) for the vehicles [Please see Capital Project C1902], body-worn cameras (BWCs) and interview room recordings [Please see Capital Project C1904]. The integrated solution would vastly increase the police department's needed ability to garner digital evidence and aid in the evidence-based prosecution phase.

Newark Police Department will equip (25) twenty-five vehicle with MVRs and has obtained a State grant to support the inclusion of MVRs in the amount of $75,000.00.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The network cabling within the Police Department (CAT5) does not meet current cabling standards (CAT6). The number of network locations are not adequate for current staffing needs as well as these locations are not ideally suited for current office layout. Multiple cables have been extended and spliced together to accomplish new needs within the department. It is IT's recommendation that an over-haul of the cabling occur in 2019 with a consolidated data closet installed. This project is similar to what the Municipal Building undertook to achieve the same improvements.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The police department is seeking to implement a fully integrated solution for its officers/investigators to include mobile video recorders (MVRs) for the vehicles, body-worn cameras (BWCs) and interview room recordings. The integrated solution would vastly increase the police department's needed ability to garner digital evidence and aid in the evidence-based prosecution phase. Additionally, common perceived benefits of implementating BWCs are Strengthening police accountability by documenting incidents and encounters between officers and the public; Preventing confrontational situations by improving officer professionalism and the behavior of people being recorded; Resolving officer-involved incidents and complaints by providing a more accurate record of events; Improving agency transparency by allowing the public to see video evidence of police activities and encounters; Identifying and correcting internal agency problems by revealing officers who engage in misconduct and agency-wide problems; Strengthening officer performance by using footage for officer training and monitoring; Improving evidence documentation for investigations and prosecutions.

The police department is seeking to implement a fully integrated solution for its officers/investigators to include mobile video recorders (MVRs) for the vehicles [Please see Capital Project C1902], body-worn cameras (BWCs) and interview room recordings [Please see Capital Project C1904].

Newark Police Department will acquire (60) sixty BWCs and upgrade the interview rooms into a single evidence solution/platform. The police department has obtained a federal grant to support the inclusion of BWCs in the amount of $90,000.00 with a (3) three-year funding period. Only (12) twelve awards were anticipated nationwide for law enforcement agencies in similar size to Newark Police Department.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The taser is a less lethal weapon utilized by officers to defend themselves or others from aggressive or actively resistant persons while reducing the risk of receiving or inflicting injury. The manufacturer warranties the X26P for 5 years. Our existing inventory of tasers are in need of replacement. A taser & holster costs a total of $1456.35/ea for 2018. Our plan is to replace 14 tasers per year. 2019 to 2023 cost estimates represent a 5% per year price increase as provided by Taser.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The ballistic vests are necessary to ensure the safety of police officers. Ballistic vests have a five year expiration date. 13 vests expire in 2019, 11 vests expire in 2020, 31 vests expire in 2021, 13 vests expire in 2022 and 4 vests expire in 2023. The current ballistic vest package costs $1,079.50 on the Delaware State Contract #GSS16585 and 2019 to 2023 costs represent a 3% per year estimated increase.

PROJECT NO: I1703

PROJECT TITLE: Recreation Management Software

PROJECT STATUS: In Progress (with end date)

*Prior Authorized Balance includes 2018 carryover funding only.

FUNDING SUMMARY:	2019	2020	2021	2022	2023	Total 5 Year
New Funding:	$ 88,500	$ -	$ -	$ -	$ -	$ 88,500
*Prior Authorized Balance:	$ -	$ -	$ -	$ -	$ -	$ -
2019-2023 Funding:	**$ 88,500**	**$ -**	**$ -**	**$ -**	**$ -**	**$ 88,500**

CAPITAL BUDGET - PROJECT DETAIL	
DEPARTMENT:	Parks & Recreation
DIVISION:	Parks & Recreation
FUND:	General
PROJECT LOCATION:	Municipal Building
PROJECT PRIORITY:	3 - Medium-High
The City would be taking a calculated risk in the deferral of this item	
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Not Applicable

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2017
Est. Completion Date:	2019
Est. Useful Life (in years):	10
Est. Total Cost:	$ 88,500
Est. Spend @ 12/31/2018 (if underway)[1]:	$ -
% Complete (if underway):	0.0%
Balance to be funded[1]:	$ 88,500

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		
Materials:		
Other Contracts:	3063006.9622	$ 88,500
TOTAL PROJECT COST		$ 88,500

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The City's Recreation Management Software is due for replacement. The current system, implemented in the late 2000's has become antiquated and is no longer efficient for managing our complex recreation programs and services to Newark residents. These services include summer camps, sports, after-school care and other recreation events across the City. This software replacement is anticipated to further merge our internal operations along the Tyler Technologies Munis platform, allowing for shared database information, cashiering and reporting.

Currently scheduled for 2019 ($88,500)

Replacement for legacy software that is no longer supported

Software responsible for Before/After School Care, Sports Activities and GWC Programs

3 Solutions being considered

Will provide online portal for residents

TOTAL PROJECT COST		$ 60,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The scope of the Preston's Playground project at the Newark reservoir has been expanded to include a permanent restroom that will house two family restrooms. Currently there is a handicapped portable toilet unit at the reservoir; this will not be conductive when Preston's Playground is completed. The handicapped units will have a smaller holding tank and get filled quicker than a regular unit. Children with special needs who will be utilizing the playground may need to have a family member assist them while using the restrooms. Portable toilets are not convenient for more than one individual at a time. The permanent unit will not only serve the Preston's Playground users but the reservoir users as well, making it more convenient for all park visitors. City Council approved including this in the 2017-2021 Capital Program by Resolution No. 16-J adopted May 9, 2016.

The project has been awarded a $78,000 grant from The Delaware Outdoor Recreation, Parks and Trail (ORPT) Grant Program for the playground project in 2018.

An additional grant of $60,000 from The Delaware ORPT Program will be applied for in 2019.

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

This project was included in the 2011 Master Plan created for Curtis Mill Park, Kershaw Parking Lot Improvements and Old Paper Mill Road Park. Placement of a bicycle/pedestrian bridge over the White Clay Creek connecting Curtis Mill Park and Kershaw Park. Federal Highway Administration "Alternative Transportation Program" (TAP) funding has been secured for the project in the amount of $1,000,000.00. This requires 20% ($200,000.00) local match so funding for the $1,000,000.00 is broken out with $800,000.00 coming from the Federal Highway Administration, $200,000.00 match from City of Newark. The funds will be distributed to DelDOT. DelDOT and their consultant (Whitman Requardt) will do the permitting, surveying, construction contract preparation and project over site. Newark will assume maintenance responsibilities once built. We have received approval from SORPT for a $200,000.00 grant to fund the local match requirement.

The city has also obtained additional funding for this project:

GRANT FUNDING:

$100,000.00 from the SORPT Grant (in addition to $200,000.00 referenced above)

$150,000.00 from Legislation Community Transportation Fund

OTHER FUNDING:

$200,000.00 from New Castle County

$100,000.00 from the University of Delaware

The project has a total of $1,550,000.00 in funding secured.

First Year in Program:	2016
Est. Completion Date:	2021
Est. Useful Life (in years):	20
Est. Total Cost:	$ 101,932
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 39,932
% Complete (if underway):	39.2%
Balance to be funded[1]:	$ 62,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	ACCOUNT NUMBER	AMOUNT
Labor:		$ -
Materials:		$ -
Other Contracts:	3063006.9620	$ 62,000
TOTAL PROJECT COST		$ 62,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

This request is to fund the completion of trail surface amendments and to purchase materials to construct and install a footbridge over a tributary of Jenney's Run, and create a trail addition for the Redd Park Trail Network. We will be requesting funding through the State's Recreation Trail Program (RTP). The program requires a 20% local match. This trail addition will connect Redd Park and the Newark Reservoir Trails to Paper Mill Road near the Thompson Station Intersection and easy access to the State of Delaware's Tri-Valley Trail.

If the grant funding is not formally approved, this project will be deferred.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

In 1994 Newark acquired this 12.7 acre parcel. The purchase was funded by the Delaware Land and Water Conservation Trust Fund (DTF). A stipulation when using DTF funding is that the property must be utilized for public outdoor recreation . For the past 12 years the site has been used as one of the City's leaf and yard waste sites. That operation is being relocated. This project is to have a master plan completed for the parkland.

Moved to 2021 to align project with DelDot improvements for Elkton Rd. and the signalization of the park entrance.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Surface improvements to the maintenance road/trail leading from Fremont Road (Fairfield Crest) to Creek Road and nearby access to the Pomeroy Trail. The maintenance Road is located within a utility easement the City has with the University of Delaware. The City will commit to making the improvements and long term maintenance to the road/trail. This project is an important connection to trails East and West. Will attempt to secure Recreation Trails Grant Funding, other grant sources and bond bill funding for this project. Work will include asphalt paving, engineering and storm water management as well as improved lighting.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The project is included in the 2011 Master Plan which was created for this site as well as the Curtis Mill Park and Old Paper Mill Road Park. The Curtis Mill Park project was completed in 2015. The project includes parking lot improvements and creating a Pomeroy Trail connection from Paper Mill Road on the South side of the White Clay Creek Bridge. Project Scope: Design and engineering, survey, permitting and construction management and landscaping. Parking lot improvements and creating a Pomeroy Trail connection from Paper Mill Road just across the South side of the White Clay Creek Bridge.

This project is a NEED and not a WANT, but no significant risk in the deferral of this item	
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Healthy & Active Community

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2019
Est. Completion Date:	2022
Est. Useful Life (in years):	50
Est. Total Cost:	$ 1,300,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ -
% Complete (if underway):	0.0%
Balance to be funded[1]:	$ 1,300,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		$ -
Materials:		$ -
Other Contracts:	3063006.9620	$ 1,300,000
TOTAL PROJECT COST		$ 1,300,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

A master plan for this project was completed in 2011, an updated plan will need to be developed.

New park construction:

-Project Scope:

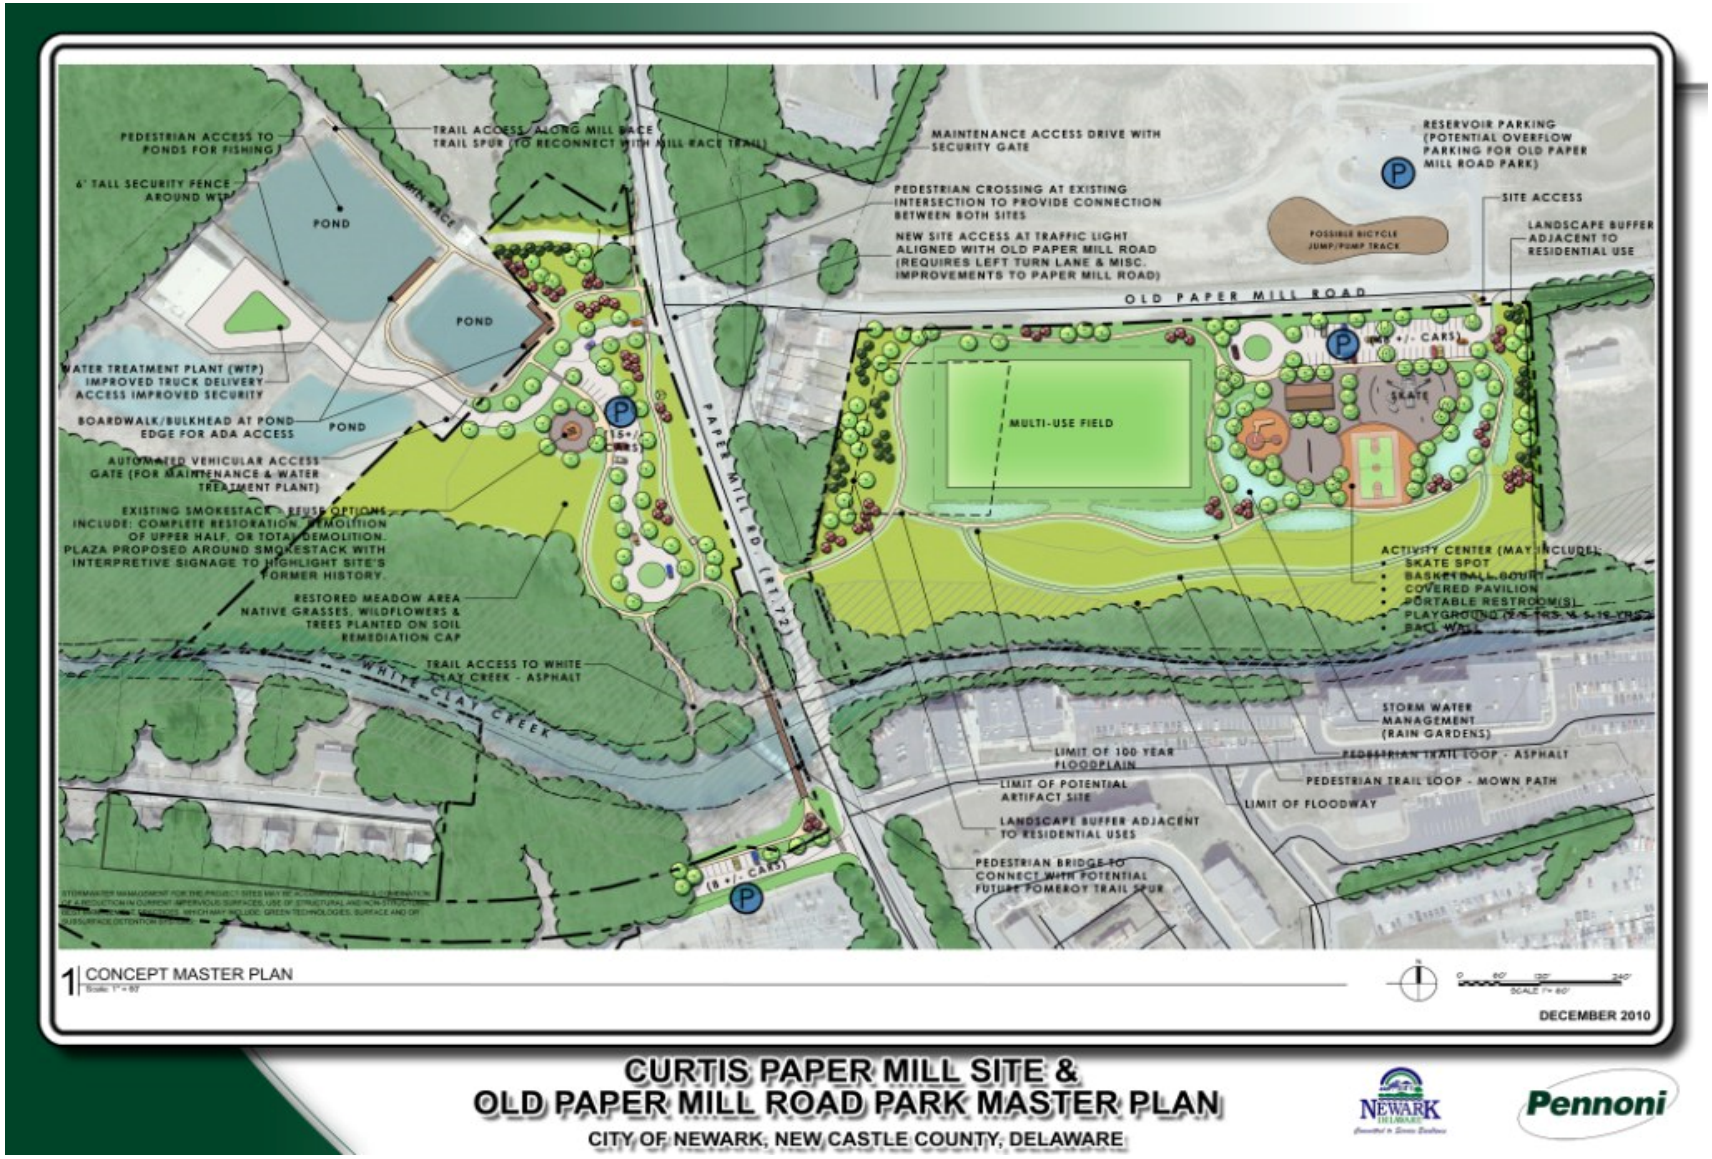

Installation of a new parking lot in 2019 to assist with overflow parking at the reservoir due to the construction of Preston's Playground and events at the reservoir. 2019 will also include updating the master plan for Old Paper Mill Park. Outlying years would include engineering, surveying, permitting, construction contract preparation, construction management and park construction. Will attempt to secure grant funding.

TOTAL PROJECT COST		$ 232,740

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Originally, based on cost and useful life estimates provided by PWWR, a program was established for municipal parking lot surface maintenance for each facility on an estimated ten year cycle, subject to inspection and recommendation by PWWR. This is an on-going effort, and is needed to remediate failing parking lot surfaces. This has been reclassified to V1901, but used to be under V1001 previously.

Lot #1: This lot is scheduled to be repaved in 2021, as it was last done in 2011. $105,000 is provided in 2021 which was also on "V1001 - Parking Lot Surface Maintenance" in 2017.

Lot #2: This lots surface was redone when 58 East Main Street was completed and multiple properties that were leased over to the City of Newark were combined with the original Lot 2 footprint. This lot does not need maintenenance at this time due to recent contrustruction.

Lot #3 and #4: These lots should be partially repaved in 2018 (drive aisles, entrance/exits, and specific lot sections), not including the new Center Street Lot #3 entrance and exit and immediate surrounding areas. Due to numerous private projects and other variables, the division has decided against trenching in the lots at this time. In Lot #4, the area of the lot that was redone during Kate's Place construction also does not need to be redone, reducing total cost further. Cost to repave drive lanes and entrance exits in both lots would cost $127,740 in 2018.

Lot #5: As this lot was completed in 2013, this lot is scheduled to be repaved in 2023/2024.

Lot #6: This lot was constructed in 2015, so this lot is scheduled to be repaved in 2025/2026.

Total 2019 Project Cost: $127,740 for Lots 3 & 4 drive lanes, entrance/exits, and select spots.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) **DESCRIPTION & JUSTIFICATION**:

Newark Parking Ambassadors use Motorola brand radios during their daily duties for communication and safety purposes. These radios connect the main office and the Parking Ambassadors to the Newark Police Department. Radios allow the Parking Ambassadors to communicate quickly and efficiently from the field. These radios are necessary for every day duties and for the safety of multiple levels of staff.

These radios play a crucial role in communicating the needs of employee, resident, and patron in the heart of downtown and in the residential areas. For employees, all radios have an emergency button in time of crisis or an emergency situation, even in an instance where the Ambassador may not be able to speak through the radio. Ambassadors communicate to the office when meters are malfunctioning or when a vehicle is found to have unpaid parking fines. When a resident or patron needs assistance, the Ambassador can quickly get on the radio and ask for assistance from the Parking Division or Police Department. The office directs its employees via these radios to areas when residents or businesses call in with parking issues.

The current radio infrastructure is failing. Radio units that were passed down from the Police Department in 2015 were already beyond their life expectancy and were already replaced by Police. The Parking Division took on the older radios when the Enforcement team was moved over to Parking. For the past 3 years, the Division has bought the necessary parts to keep radios functioning, but costs for these parts are increasing, while the quality and value of the radios are decreasing. Further reduction in radio quality puts the employee at risk and hurts customer service. Trade-in value is also rapidly decreasing for the radios.

The Parking Division is requesting $27,000 for a complete Motorola Radio fleet to replace the outgoing fleet. This brand and style of radio is necessary to connect to the Police Department.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

In an effort to increase available parking in Newark's Central Business District, the City is working to remove two buildings in the southwest corner of Lot #1 and assume control over the parcel from the University of Delaware. With removal of these buildings, which are currently not in use by the University, the City can add up to 48 new parking spots in a lot that often reaches maximum capacity. These spaces will play a critical role in alleviating the stress the City parking infrastructure will experience during DELDOT's Main Street rehabilitation project, where there will be a significant loss in on-street parking near Main Street businesses.

The University agreed to transfer properties 42 and 46 East Delaware Ave to the City of Newark as part of the 83 East Main Street Bookstore project. A parking garage was a requirement in the original agreement as a condition prior to transfer of the property, but a garage is not in the foreseeable future at this time. City staff contacted UD leadership to initiate negotiations and a set of revised conditions were set in place, with a majority of UD's requested conditions being related to aesthetics and protections to nearby dorms, as well as a condition to eliminate an annual payment by UD to the City for previously removed on-street spaces along South College Avenue, a loss of $38,500 per year. The anticipated increase from new spaces in Lot #1 would be $132,000 annually, a net increase of $93,500 per year, at current parking rates.

Total cost for the project would be $290,000. Return-on-investment would be approximately 3 to 4 years after completion of the project. ROI could be considerably faster pending rate change, population increase, and displacement by future construction projects.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The Parking Division, in addition to enforcement responsibilities, took over residential parking permit administration from the Newark Police Department in 2017 as part of the T2 (integrated parking system) capabilities. As the new T2 system will eventually allow us to be more efficient in residential parking permit administration by inputting license plate numbers of vehicles permitted to park in residential parking permit areas as opposed to issuing permit stickers for the vehicles, License Plate Recognition capabilities in at least one Parking Ambassador vehicle is recommended.

An LPR will significantly reduce the abuse of the residential guest parking permit system, which has become apparent to the division since assuming parking enforcement responsibilities, and which has recently been a concern for residents and members of Council in some residential areas. The estimated cost in 2020 is $70,000 for hardware, with additional required subscriptions and services totaling $30,000, for a grand total of $100,000.

The LPR, teamed with the T2 system, will also allow for license plate recognition of scofflaws, which are currently tracked by hand or if another violation is evident. With the LPR system, scofflaws will automatically come to the attention of Parking Ambassadors. Based on the University of Delaware's experience with LPRs, and on Parking Ambassadors' previous experience with using a NPD LPR to identify scofflows, we expect the LPR to pay for itself within a short period of time.

Prior authorized funds in the amount of $47,850 were deauthorized from Capital Project WV1701 in 2018. $19,820 of these funds were sent to operating expense 5495404.8130 (Parking Division - Building and Equipment Rentals). The remaining $28,030 was returned to reserves.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Originally titled 'V1702 - Parking Meters and Sensors', the Parking Division has revised this project, aiming to pair all current meters to sensors. The division has researched additional parking sensor location opportunities and indicates that there are locations where approximately 200 sensors can be installed throughout the City. For the 457 meters currently in the system, only 268 of them have sensors. By adding sensors to all on-street parking meters that currently do not have sensors, the division will be able to report occupancy information to Mayor and Council on a city-wide basis. IPS Smart Meters has also developed a new pole-mounted sensor, that does not need to be drilled into the ground, which the division believes will eliminate paving/plowing issues that could affect in-grounsd sensors. Estimated cost per new sensor is approximately $300 per sensor. Therefore, the new sensor request is for $60,000 to complete all City meters. Return-on-investment for these sensors is one year.

Current in-ground sensors on Main Street would be moved to peripheral areas of the City, while the the new pole-mounted sensors would be put throughout the Central Business District. The division recommends putting the newest equipment in the busiest section of town. It is also recomended that the pole-mounted sensors be placed on Main Street, as DELDOT has discussed a repaving project through Main Street, which would require a uninstall/reinstall of in-ground sensors. Cost to do this, at any time, will now cost the Division approximately $55 per sensor, and with 150 sensors, total cost for reinstallation would be $8,250.

The Parking Division requested an additional $14,010 to the prior 2017 amount of $54,240, to pair all on-street meters with sensors.

2018 Project costs = $68,250.

2019 Additional project funds needed = $15,000
*2019 funding breaks out to an estimated 30 sensors at $500 each.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Lot countdown signs have been installed at multiple entrances to Lots 1, 3, and 4, indicating to customers the accurate count of open spaces available in the lots, to increase customer convenience and reduce traffic congestion. These signs allow the customer to make an educated decision to which parking lot they enter to find parking, rather than pulling into and circling a lot that has no available parking spaces. With the advice of City Council, the signs were installed in select locations. The lot countdown sign's cloud-based software keeps track of lot occupancy so that it can be reported to Mayor and Council. Current occupancy can be reported to an online GIS map so that patrons with access to the internet can see the real-time occupancy of any pay-by-hour municipal parking lot before coming downtown.

Upon recommendation from the Parking Subcommittee, this program should be extended to include major entrance points into the City of Newark into multi-lot countdown signs that shows availability in all parking lot options offered by the City. If possible, the City would like to collaborate with the University of Delaware to include their Trabant Parking Garage, as the structure is a viable option for patrons of City of Newark businesses. The Division is requesting $12,000 in 2019 for a single, collaborative sign to be placed at the beginning of Main Street, near Pomeroy Trail, that all vehicle traffic would see as they enter onto Main Street. University of Delaware would provide the other half of the cost to have their Trabant garage countdown information put on the sign. Pending success of the first sign, the City could discuss more signage in the future.

DEPARTMENT:	Finance
DIVISION:	Information Technology
FUND:	General
PROJECT LOCATION:	Municipal Building
PROJECT PRIORITY:	2 - High Priority Level
Critical need to remediate failing service, prevent failure, or generate savings	
COMPREHENSIVE DEVELOPMENT PLANNING VISION ELEMENT:	Not Applicable

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2019
Est. Completion Date:	2019
Est. Useful Life (in years):	5
Est. Total Cost:	$ 58,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ -
% Complete (if underway):	0.0%
Balance to be funded[1]:	$ 58,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		$ -
Materials:	3063006.9622	$ 58,000
Other Contracts:		$ -
TOTAL PROJECT COST		$ 58,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The City of Newark utilizes a pair of redundant SonicWALL firewalls as our main line of defense against outside cyber threats as well as inside security vulnerabilities. This system has been in production since 2013 and has performed very well given the level of technology that existed when it was purchased; however, this model is reaching its end of support. Once end of support is reached, we will no longer receive technical support, firmware updates/upgrades or hardware replacement. This system is a critical part of our infrastructure and with advancing technologies and increased threats it is crucial that this system be replaced. To future proof our investment we have chosen a slightly more powerful model, the SonicWALL NSA 6650, that will facilitate our needs as we progress and grow. The NSA 6650 provides increased processing power, routing capabilities and provides 10 Gigabit network ports which will increase our network speed to match our current network switch infrastructure. In addition, this model offers data encryption, deep threat inspections, application control, content filtering and high availability ISP load balancing which are considered top of the industry standards of today. Staying with SonicWall allows for an easy transition as our current configuration can be migrated to the new firewall.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Tyler Technologies Contracts Module supports the entire lifecycle of a contract from initiation to expiration. This program allows users to create and approve both annual and multi-year contracts for purchases and optionally encumber the appropriate funds in advance. Users are able to allocate contracts by account or account segment, as well as define milestones and key dates that trigger an optional Munis Dashboard alert that notifies the appropriate staff. Contract Management is fully integrated with general ledger, purchasing and accounts payable which allows users to track and withhold contract sliding scale retainage based off percentage complete and also provides the ability to track pending payments, open requisitions, purchase orders and contract change orders.
2020 Estimate: $11,500.00 *This module was advanced from 2019 to 2020.

Tyler Technologies Bid Module can create any number of bid catalogs. Bid catalogs can be initiated for yearly purchases of items or generated through the Munis requisition process. Individual departments can enter on-line requested quantities for item being put out to bid. Once the bid has been established notifications can be sent to vendors via e-mail. Vendors can either mail their bids to the requesting site or optionally enter their bid information using Munis Self-Service. Additional criteria in the form of custom RFP questions can also be attached to a Munis bid. From vendor responses, Munis determines the best vendor to award a bid to by individual bid line item. Awarded bids can be used to create Purchase Orders or converted into a Contract that can be purchased against for the term of the bid.
2020 Estimate: $11,500.00 *This module was advanced from 2019 to 2020.

Tyler Technologies Cash Management Module will provide the Finance department with:
- Disbursement and check reconciliation functions from accounts payable and payroll
- A separate file for recording bank account transactions including pooled cash, investment detail files and debt detail files
- A tool for cash flow forecasting for any cash account or date range, which provides the option to integrate with accounting system transactions to provide a budget vs. actual cash flow file
- Bank Reconciliation, which reconciles Munis cash accounts (book balance) with their corresponding bank accounts (bank balance)

2019 Estimate: $17,700.00

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The 2017 Fiber Installation Project was a major success. Our surveillance cameras, SCADA systems, Buildings and other networked connections are now running on the Phase I network that has been installed. This project signals a continuation of the build-out to install Fiber to areas such as South College Avenue near I95, to the South Well Field Water Plant and to the George Wilson Center. While fiber to these areas is recommended for additional Police surveillance needs, there are a multitude of other solutions that are possible with these extensions, including but not limited to SCADA integration, WiFi and parking management. There would be minimal offset cost as currently two of these areas are utilizing Comcast services to provide access.

Currently scheduled for 2020 ($140,000) - Extension of existing fiber network to 3 main areas:
South College Avenue towards I95 interchange - In reviewing crime data, Newark PD has investigated (107) robberies from January 2015 to July 2018; (25) robberies have occurred on S. College Ave. The PD has installed a LPR in the vicinity which has proven valuable and the PD submits cameras in the vicinity would complement investigative and preventive efforts – as there are no City controlled surveillance camera assets along the corridor. Currently, investigators rely on private entities for video evidence which is often limited to the interior of their business or property and provides limited coverage and investigative leads. Sourced: Capt. Michael Van Campen

South Well Field for SCADA
New London Road (George Wilson Center) for additional cameras and to connect facility to core network.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Harris NorthStart (and associated applications) is used for Utility Billing and Smart-Meter Utility Management. It has been recommended by the vendor, and vetted by staff, that implementing an automation platform would substantially improve efficiency in processing utility billing. This would eliminate much of the manual efforts that our Payments and Utility Billing Team handle daily.

Placeholder Project based on feedback from Utility Billing Vendor (Harris Computer Corporation)

Would be used to automate many tasks currently performed manually, such as:
- Billing Improvements including Validation Procedures and Processes
- Credit Control – Late Payment Penalties and Disconnect Notices
- Preauthorized Payments (PAP)

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Long range forecast cost for replacement of Microsoft Hyper-V Virtualization Host (Server) Replacement. The City's virtualization environment is critical to maintaining 100+ physical and virtual servers running throughout the organization. These servers host applications such as Utility Billing and Smart Meter Applications, as well as file services, print services, document management and retention services and a myriad of other applications that impact operations.

Currently scheduled for 2020 ($75,000)
Replacement for equipment purchased in 2016 (4 year replacement)
Server and Storage for IT Datacenters

This is an estimated cost and will be formally quoted during annual budget preparation in late 2019.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

IMPACTED DEPARTMENT/DIVISION: Newark Police Department

The City of Newark surveillance cameras and network are showing their age. Most of the cameras are at least 8 years old and we are starting to see them fail with regularity. It is IT's recommendation that the cameras be replaced over a period between 5 and 6 years to ensure optimum functionality and savings on repair.

Project began in 2017 and expected completion in 2022
Replacing 5 traffic cameras per year (total of 30 cameras - 10 replaced in 2017)

Axis Q6045-C PTZ Dome 60Hz Network Camera
30 Cameras - $123,000.00 + Installation - $60,000.00 + OnSSI Licensing - $12,000.00 = $195,000.00 Total Project Cost

*Please note, $19,407 was spent at end of year 2017.

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2016
Est. Completion Date:	2020
Est. Useful Life (in years):	5
Est. Total Cost:	$ 75,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ -
% Complete (if underway):	0.0%
Balance to be funded[1]:	$ 75,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	ACCOUNT NUMBER	AMOUNT
Labor:		$ -
Materials:	3063006.9622	$ 25,000
Other Contracts:	3063026.9622	$ 50,000
TOTAL PROJECT COST		$ 75,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Long range forecast cost for replacement of Disaster Planning, Recovery and Availability hardware within two City-owned data centers. These services are critical for ensuring resiliency in the event of a cyber attack, data loss, hardware failure or environmental or man-made disaster.

Currently scheduled for 2020 ($75,000)
Replacement for equipment purchased in 2016 (4 year replacement)
Server and Storage for IT Datacenters

This is an estimated cost and will be formally quoted during annual budget preparation in late 2019.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

This project covers the replacement of the existing HVAC system at the City Municipal Building and Newark Police Department Buildings. These units are very inefficent and currently require a substantial amount of routine maintenance.

It is anticipated that this upgrade will result in ongoing operational savings, which will be determined during a future CIP budget cycle.

Funding Schedule:

2019: $50,000
-The funds allocated in 2019 are for the planning and designing of the HVAC system replacement.

2020: $950,000
-The funds allocated in 2020 are for implementation of the 2019 plan and the construction costs related.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The rear concrete stairs at City Hall/NPD are in need of replacement. The concrete has deteriorated and employees have suffered injuries due to the uneveness of the stairs. Also, the metal support structure beneath the concrete catwalk has disintegrated due to rust. Currently nothing is supporting the concrete, which could cause the structure to crumble and fall. This project would repair and replace the impacted areas. This is a project to improve safety.

Project spun out of CIP N1601 that included multiple building repairs, including the concrete stairs. This has been broken out for transparency and project tracking purposes.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

City Hall and NPD buildings are in need of a thorough cleaning and painting of the metal cornice surround at the top of each building. These projects constitute a need to maintain our existing building, and are not considered upgrades or consmetic improvements. In years past, these types of projects were disregarded due to cost and budget, however time has caught up with us and the brick is in need of a cleaning and rusted metal is in need of protective paint.

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Currently a single stall bathroom is available in the lower level. It is recommended to install a second bathroom on that level due to increased staffing after having migrated multiple City employees to the lower level. Recent use of the Training Room by City staff, along with staff from other State and Private Agencies has highlighted the issue with a single stall restroom. This project funding would be used to create a second restroom in place of an existing janitors closet to provide male and female restrooms on the lower level. It should also be noted that a new restroom, and a minor upgrade to the existing restroom would allow the City to be ADA compliant on the lower level.

§ 806.1(3) SUMMARY OF PROJECT DATA	
First Year in Program:	2018
Est. Completion Date:	2019
Est. Useful Life (in years):	20
Est. Total Cost:	$ 348,000
Est. Spend @ 12/31/2018 (if underway)[1]:	$ 123,000
% Complete (if underway):	35.3%
Balance to be funded[1]:	$ 225,000

[1] For ongoing projects, we must estimate total spent since inception through current year to derive the balance to be funded thereafter.

PROJECT COST BY CATEGORY		
CLASSIFICATION	**ACCOUNT NUMBER**	**AMOUNT**
Labor:		$ -
Materials:		$ -
Other Contracts:	6006016.9621	$ 225,000
TOTAL PROJECT COST		$ 225,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

This project was previously identified as M1101 (PWWR - Maintenance) and has now been moved and renumbered to Facilities Divsion.

Phase 1: Needs Assessment and Master Planning (Completed 2016)
Phase 2: Salt Shed Construction (Completed 2017)
Phase 3: Demolition of Building #3 (2018) - Estimate $53,000, and Additional Electric Utility Storage in Building #2 (2018) - Estimate $70,000
Phase 4: New Parking Area (2019) - Estimate $100,000
Phase 5: Construction of Expanded Building #3 (2019) - Estimate $125,000

The Old Warehouse at the Facilities Operations Complex (Yard) is becoming a safety risk due to its condition. This building houses items such as: Vehicles, Electric Utility, Public Works Pumps and Filtering Media, Pipes and Hydrants, Police Impound. New Building Design is currently being evaluated.

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Train Station windows are in desperate need of replacement. They are falling apart due to age. This is a safety issue as they have the potential to actually fall out of the wall. Beyond this, they are energy inefficient year round and do not open properly when used. Looking to secure grant-funding for this project during 2019.

TOTAL PROJECT COST		$ 25,000

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

Based on feedback from City Council during Budget Hearings, the City staff has identified the following improvements to the Council Chamber to make it more functional for Mayor and Council, City staff and visitors. The requested modifications to the Council Chamber include replacing the existing hard seated chairs with cushioned chairs for visitors and staff, adding paneling to the front of the dais to improve its appearance both in person and on camera, relocating the large paintings behind the dais to a more appropriate historical location and to paint the brick to brighten the room and enhance quality of the online/tv feed. Additionally, the orange Formica countertops would be replaced with a more neutral color. Lastly, new lighting and projector would be added to the room to make it more inviting and to provide better presentation quality.

*Estimates as of 2017, 2020 figure expects to see some increases in costs:

$4,500.00 - Padded/Stackable Chairs
$1,000.00 - Paint and supplies
$3,000.00 - Wood Paneling
$8,000.00 - Formica Countertops
$1,300.00 - Lighting
$5,000.00 - Projector (brighter so lights do not need to be turned off)

[2] Council is not required to authorize budget year funding for this portion, but this portion of the project will indeed represent a cash outflow in the budget year and/or "out years."

Charter § 806.1(2) DESCRIPTION & JUSTIFICATION:

The existing HVAC system at the George Wilson Center utilizes electric baseboard heat and individual wall unit air conditioners. The air conditioners are old and leak, and need to be shut off at night to minimize damage from leakage. Facilities Management staff brought in several different HVAC contractors to assess the situation and all agree that upgrading to a combined single heat and air conditioning system will provide greatly improved efficiency and reduce overall heating and air conditioning costs for the Center, as well as improve the overall appearance of the building. Estimated costs include a combined heat and air conditioning system, (heat pump option at $89,400), filling in 7 A/C holes currently cut into the building ($5,480); and painting ($2,000) and site work/trash disposal ($2,000) which will be done in house.

Increased costs of $6,120 are due to increases within the vendor contract quote from 2017.

It is anticipated that this upgrade will result in ongoing operational savings, which will be determined by the end of year 2019.
